BDCAF The Behçet's Disease Current Activity Form

The Behçet's Disease Current Activity Form (2006) allows clinicians to capture the patient's perception and experience of symptoms from over a period of 4 weeks prior to assessment, giving an overall Activity Index.

The Behçet's Disease Current Activity Form (2006) allows clinicians to capture the patient's perception of their disease activity and experience of symptoms from over a period of 4 weeks prior to assessment, giving an overall Activity Index. The presence/absence of 9 somatic symptoms from a list may be recorded, together with eye involvement, nervous system involvement, major vessel involvement, as well as the clinician's overall perception of disease activity.

For commercial use of this product, please contact us.
