Control of Eating Questionnaire (CoEQ)

The Control of Eating Questionnaire (CoEQ) is a brief, 21-item scale to assess the severity and type of food cravings an individual experiences.

The Control of Eating Questionnaire (CoEQ) comprises 21-items across 4 sub-domains that are designed to assess the severity and type of food cravings an individual experiences over a pre-defined retrospective period (e.g. 24h; 1-week; 1-month). The CoEQ has been used in clinical trials as a multi-dimensional measure of appetite, craving and mood regulation. The CoEQ has good psychometric properties with a clear component structure and internal consistency. The CoEQ is valid as a measure of the experience of food cravings.

Commercial Licences:

If you are interested in using the CoEQ for commercial purposes, including clinical, organisational, or consultancy applications, please get in touch to discuss licensing options. We offer licence agreements to suit different commercial needs.

Contact us at enquiries@licensing.leeds.ac.uk to begin the conversation about commercial licensing.

Academic/Research Licences (available to order):

The CoEQ was originally developed in UK/English. It is available for academic and research purposes under the following terms:

- Original UK/English version: Free of charge for academic/research use only (i.e. strictly non-commercial purposes).
- Translations:
 - Arrange your own translation of the original UK/English version (subject to licence terms), or
 - Purchase an official validated translation (includes Certificate of Translation) for **academic/research use only** at a cost of £350 (excl. VAT) per language.
 - You can request translations during the checkout process
- Approval Process: All licence requests are subject to review and approval.
- Eligibility: Academic/research licences are only granted to individuals affiliated with a university or recognised research institution.
- Email Requirement: Requests **must** be submitted using an **academic email address** (either your own or your supervisor's).
