

WISE Epilepsy Work Instability Scale

A Work Instability Scale questionnaire consisting of 24 statements made by people who are working with Epilepsy, together with Scoring and Guidance for use in the clinic.

A Work Instability Scale questionnaire consisting of 24 statements made by people who are working with epilepsy (WISE). Answers are given using a binary TRUE / NOT TRUE format dependent on whether they apply to the respondent. WISE is a simple, validated screening tool for Work Instability (the consequences of a mis-match between an individual's functional ability and their work tasks). This is a self-administered measure enabling the monitoring the risk of Work Disability in epilepsy patients.
